

# SAFETY DATA SHEET according to Regulation (EC) No. 1907/2006

# ISOPROPANOL - DRUM 160K

Version 1.0 Print Date 27.08.2020

Revision date / valid from 26.08.2020

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

Trade name : ISOPROPANOL - DRUM 160K

 Substance name
 : propan-2-ol

 Index-No.
 : 603-117-00-0

 CAS-No.
 : 67-63-0

 EC-No.
 : 200-661-7

EU REACH-Reg. No. : 01-2119457558-25-xxxx

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Use of the : Identified use: See table in front of appendix for a complete

Substance/Mixture overview of identified uses.

Uses advised against : At this moment we have not identified any uses advised

against

Remarks : Before referring to any Exposure Scenario attached to this

Safety Data Sheet please check the grade of the product: the Exposure Scenarios presented are not related to all product

grade

## 1.3. Details of the supplier of the safety data sheet

Company : Brenntag N.V.

Nijverheidslaan 38 BE 8540 Deerlijk +32 (0)56 77 6944

Telephone : +32 (0)56 77 6944
Telefax : +32 (0)56 77 5711
E-mail address : info@brenntag.be

Responsible/issuing : Master Data Administration

person

Company : Brenntag Nederland B.V.

Donker Duyvisweg 44 NL 3316 BM Dordrecht +31(0)78 65 44 944

Telephone : +31(0)78 65 44 944
Telefax : +31(0)78 65 44 919
E-mail address : info@brenntag.nl

Responsible/issuing : Master Data Administration

person

#### 1.4. Emergency telephone number

Emergency telephone : Belgium: Antipoison Center - Brussels TEL: +32(0)70 245 245

80000000158 1/17 EN

# ISOPROPANOL - DRUM 160K

number

Netherland: National Poisoning Information Center - Bilthoven TEL: +31(0)30 274 8888 (Only for the purpose of informing medical personnel in cases of acute intoxications)

## **SECTION 2: Hazards identification**

## 2.1. Classification of the substance or mixture

Classification according to Regulation (EC) No 1272/2008

REGULATION (EC) No 1272/2008								
Hazard class Hazard category Target Organs Hazard statements								
Flammable liquids	Category 2		H225					
Eye irritation	Category 2		H319					
Specific target organ toxicity - single exposure	Category 3	Central nervous system	H336					

For the full text of the H-Statements mentioned in this Section, see Section 16.

## Most important adverse effects

Human Health : See section 11 for toxicological information.

Physical and chemical

hazards

See section 9/10 for physicochemical information.

Potential environmental

effects

See section 12 for environmental information.

#### 2.2. Label elements

## Labelling according to Regulation (EC) No 1272/2008

Hazard symbols :

Signal word : Danger

Hazard statements : H225 Highly flammable liquid and vapour.

H319 Causes serious eye irritation.

H336 May cause drowsiness or dizziness.

Precautionary statements

Prevention : P210 Keep away from heat, hot surfaces, sparks,

80000000158 / Version 1.0 2/17 EN

# ISOPROPANOL - DRUM 160K

open flames and other ignition sources. No

smoking.

P261 Avoid breathing vapours/spray.

P280 Wear protective gloves/ eye protection/ face

protection.

Response : P305 + P351 + P338 IF IN EYES: Rinse cautiously with

water for several minutes. Remove contact lenses, if present and easy to do. Continue

rinsing.

P304 + P340 + P312 IF INHALED: Remove person to fresh

air and keep comfortable for breathing. Call a POISON CENTER/doctor if you feel

unwell.

Storage : P403 + P235 Store in a well-ventilated place. Keep cool.

# Hazardous components which must be listed on the label:

• propan-2-ol

#### 2.3. Other hazards

For Results of PBT and vPvB assessment see section 12.5.

# SECTION 3: Composition/information on ingredients

#### 3.1. Substances

			Classification (REGULATION (EC) No 1272/2008)			
Haza	rdous components	Amount [%]	Hazard class / Hazard category	Hazard statements		
propan-2-ol						
Index-No. CAS-No. EC-No. EU REACH- Reg. No.	: 603-117-00-0 : 67-63-0 : 200-661-7 : 01-2119457558-25-xxxx	<= 100	Flam. Liq.2 Eye Irrit.2 STOT SE3	H225 H319 H336		

For the full text of the H-Statements mentioned in this Section, see Section 16.

## **SECTION 4: First aid measures**

# 4.1. Description of first aid measures

General advice : Remove from exposure, lie down. Take off all contaminated

80000000158 / Version 1.0 3/17 EN

# ISOPROPANOL - DRUM 160K

clothing immediately.

If inhaled : Remove to fresh air. If breathing is irregular or stopped,

administer artificial respiration. If unconscious place in recovery position. Consult a physician after significant

exposure.

In case of skin contact : Wash off immediately with soap and plenty of water. If skin

irritation persists, call a physician.

In case of eye contact : Rinse immediately with plenty of water, also under the eyelids,

for at least 10 minutes. Consult an eye specialist immediately.

Go to an ophthalmic hospital if possible.

If swallowed : Clean mouth with water and drink afterwards plenty of water.

Never give anything by mouth to an unconscious person. Do NOT induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Call a

physician immediately.

## 4.2. Most important symptoms and effects, both acute and delayed

Symptoms : Inhalation of high vapour concentrations may cause symptoms

like headache, dizziness, tiredness, nausea and vomiting. See Section 11 for more detailed information on health effects and

symptoms.

Effects : See Section 11 for more detailed information on health effects

and symptoms.

# 4.3. Indication of any immediate medical attention and special treatment needed

Treatment : Treat symptomatically.

# **SECTION 5: Firefighting measures**

#### 5.1. Extinguishing media

Suitable extinguishing

media

: Use water spray, alcohol-resistant foam, dry chemical or

carbon dioxide.

Unsuitable extinguishing

media

High volume water jet

## 5.2. Special hazards arising from the substance or mixture

Specific hazards during

firefighting

The vapour may be invisible, heavier than air and spread along ground. Vapours may form explosive mixtures with air.

Flash back possible over considerable distance.

Hazardous combustion

products

Carbon monoxide, Carbon dioxide (CO2)

#### 5.3. Advice for firefighters

80000000158 / Version 1.0

4/17

# ISOPROPANOL - DRUM 160K

Special protective equipment for firefighters Further advice

In the event of fire, wear self-contained breathing apparatus. Wear personal protective equipment. Cool closed containers exposed to fire with water

spray. Heating will cause a pressure rise - with risk of bursting. Collect contaminated fire extinguishing water separately. This must not be discharged into drains.

#### **SECTION 6: Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions : Keep away from heat and sources of ignition. Use personal

protective equipment. Keep away unprotected persons. Provide adequate ventilation. Avoid contact with skin and

eyes. Do not breathe vapours or spray mist.

## **Environmental precautions**

Environmental precautions

: Do not flush into surface water or sanitary sewer system.

Avoid subsoil penetration.

#### Methods and materials for containment and cleaning up

containment and cleaning

Methods and materials for : Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to

local / national regulations (see section 13).

# Reference to other sections

See Section 1 for emergency contact information.

See Section 8 for information on personal protective equipment.

See Section 13 for waste treatment information.

## **SECTION 7: Handling and storage**

## 7.1. Precautions for safe handling

Advice on safe handling : Keep container tightly closed. Ensure adequate ventilation. Use

personal protective equipment. Avoid contact with skin, eyes and clothing. Do not breathe vapours or spray mist. Emergency eye wash fountains and emergency showers should be

available in the immediate vicinity.

Hygiene measures : Keep away from food, drink and animal feedingstuffs. Smoking,

> eating and drinking should be prohibited in the application area. Wash hands before breaks and at the end of workday. Take off

all contaminated clothing immediately.

## 7.2. Conditions for safe storage, including any incompatibilities

# ISOPROPANOL - DRUM 160K

Requirements for storage areas and containers

: Store in original container. Keep in an area equipped with solvent resistant flooring. Unsuitable materials for containers: Aluminium; polystyrene; ethylene propylene diene rubber; butylrubber; natural rubber; cast iron

Advice on protection against fire and explosion

: Keep away from sources of ignition - No smoking. Vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Take measures to prevent the build up of electrostatic charge. Use only in an area containing explosion proof equipment.

Further information on storage conditions

: Keep tightly closed in a dry and cool place. Keep away from direct sunlight. Keep in a well-ventilated place.

Advice on common storage

: Incompatible with oxidizing agents. Do not store together with oxidizing and self-igniting products. Keep away from food,

drink and animal feedingstuffs.

Suitable packaging materials

: Stainless steel

#### 7.3. Specific end use(s)

Specific use(s) : Identified use: See table in front of appendix for a complete

overview of identified uses.

## SECTION 8: Exposure controls/personal protection

## 8.1. Control parameters

#### Derived No Effect Level (DNEL)/Derived Minimal Effect Level (DMEL)

**DNEL** 

Workers, Long-term - systemic effects, Skin contact : 888 mg/kg bw/day

DNEL

Workers, Long-term - systemic effects, Inhalation : 500 mg/m3

**DNEL** 

Consumers, Long-term - systemic effects, Skin contact : 319 mg/kg bw/day

DNEL

Consumers, Long-term - systemic effects, Inhalation : 89 mg/m3

DNEL

Consumers, Long-term - systemic effects, Ingestion : 26 mg/kg bw/day

## **Predicted No Effect Concentration (PNEC)**

800000000158 / Version 1.0

6/17

ΕIN

# ISOPROPANOL - DRUM 160K

Fresh water : 140,9 mg/l

Marine water : 140,9 mg/l

Intermittent releases : 140,9 mg/l

Sewage treatment plant (STP) : 2251 mg/l

Sediment : 552 mg/kg d.w.

Soil : 28 mg/kg

Secondary poisoning : 160 mg/kg food

## **Other Occupational Exposure Limit Values**

Belgium. OELs. Exposure Limit Values to Chemical Substances at Work, Code of Well-being at work, Book VI, Title 1, as amended, Time Weighted Average (TWA): 200 ppm, 500 mg/m3

Belgium. OELs. Exposure Limit Values to Chemical Substances at Work, Code of Well-being at work, Book VI, Title 1, as amended, Short Term Exposure Limit (STEL): 400 ppm, 1.000 mg/m3, (15 minutes)

# 8.2. Exposure controls

# **Appropriate engineering controls**

Refer to protective measures listed in sections 7 and 8.

## Personal protective equipment

Respiratory protection

Advice : In case of insufficient ventilation, wear suitable respiratory

equipment.

When aerosol or mist is formed use suitable respiratory protection.

Respiratory protection complying with EN 141.

Recommended Filter type:A Combination filter: A-P2

In case of intensive or longer exposure use self-contained

breathing apparatus.

Hand protection

Advice : Protective gloves complying with EN 374.

Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion,

and the contact time.

Protective gloves should be replaced at first signs of wear.

# ISOPROPANOL - DRUM 160K

Material : Nitrile rubber Break through time : >= 8 h Glove thickness : 0,35 mm

Material : Fluorinated rubber

Break through time : >= 8 hGlove thickness : 0,4 mm

Material : butyl-rubber
Break through time : >= 8 h
Glove thickness : 0,5 mm

Eye protection

Advice : Safety goggles

Skin and body protection

Advice : Solvent resistant protective clothing

**Environmental exposure controls** 

General advice : Do not flush into surface water or sanitary sewer system.

Avoid subsoil penetration.

# **SECTION 9: Physical and chemical properties**

# 9.1. Information on basic physical and chemical properties

Form : liquid

Colour : colourless

clear

Odour : alcohol-like

Odour Threshold : no data available

pH : no data available

Melting point/range : -89 °C

Boiling point/boiling range : 82 °C (ASTM D1078)

Flash point : 12 °C (Method: ASTM D 56)

Evaporation rate : 3,9 (Butyl Acetate = 1)

Flammability (solid, gas) : Not applicable

80000000158 / Version 1.0 8/17 EN

# ISOPROPANOL - DRUM 160K

Upper explosion limit : 13 %(V)

Lower explosion limit : 2 %(V)

Vapour pressure : 43 hPa (20 °C)

Relative vapour density : > 1 (Air = 1.0)

Relative density : 0,786 (20 °C)

Water solubility : completely soluble

Partition coefficient: n-octanol/water : log Kow 0,05

Auto-ignition temperature : > 350 °C

Thermal decomposition : no data available

Viscosity, dynamic : 2,5 mPa.s (20 °C)

Viscosity, kinematic : 2,66 mm2/s (25 °C) (ASTM D 7042)

Explosivity : Product is not explosive. Formation of explosive

air/vapour mixtures is possible.

Oxidizing properties : not oxidising

9.2. Other information

Molecular weight : 60,10 g/mol

# **SECTION 10: Stability and reactivity**

10.1. Reactivity

Advice : No decomposition if stored and applied as directed.

10.2. Chemical stability

Advice : Stable under recommended storage conditions.

10.3. Possibility of hazardous reactions

Hazardous reactions : Possible formation of peroxide.

Note : Formation of explosive air/vapour mixtures is possible.

10.4. Conditions to avoid

Conditions to avoid : Heat, flames and sparks.

10.5. Incompatible materials

Materials to avoid : Strong oxidizing agents, Amines, Aldehydes, alkanolamines,

alkalis, Strong acids

80000000158 / Version 1.0 9/17 EN

# ISOPROPANOL - DRUM 160K

# 10.6. Hazardous decomposition products

Hazardous decomposition : Under fire conditions: Carbon oxides

products

# **SECTION 11: Toxicological information**

# 11.1. Information on toxicological effects

Component:	propan-2-ol	CAS-No. 67-63-0
	Acute toxicity	
	Oral	
LD50	: 5840 mg/kg (Rat) (OECD Test Guide	eline 401)
	Inhalation	
LC50	: > 25 mg/l (Rat; 6 h; vapour) (OECD 7	Test Guideline 403)
	Dermal	
LD50	: 13900 mg/kg (Rabbit) (OECD Test G	Guideline 402)
	Irritation	
	Skin	
Result	: No skin irritation (OECD Test Guideli which may cause dry and rough. Pro contact may result in dermatitis.	
	Eyes	
Result	: Eye irritation (OECD - Guideline 405) strong pain. Vapour acts irritant.	)Splashes in eyes may cause
	Sensitisation	
Result	: not sensitizing (Buehler Test; Dermal Guideline 406)	I; Guinea pig) (OECD Test
	CMR effects	
	Carcinogenicity	
NOEL	: 5.000 ppm (negative, Mouse, male and female)(	Inhalation; 0, 500, 2500, 5000
000000158 / Version 1.0	10/17	

# ISOPROPANOL - DRUM 160K

ppm; 78 weeks; Frequency of treatment: 5 days/week)(OECD Test

Guideline 451)

# **CMR Properties**

Carcinogenicity: Based on available data, the classification criteria are not met.

Mutagenicity : In vitro tests did not show mutagenic effects

In vivo tests did not show mutagenic effects

Teratogenicity : No effects on or via lactation

Reproductive toxicity: Based on available data, the classification criteria are not met.

## Genotoxicity in vitro

Result : negative (Bacterial Reverse Mutation Test; Salmonella

typhimurium; with and without metabolic activation) (OECD Test

Guideline 471)

negative (In vitro gene mutation study in mammalian cells; CHO

(Chinese Hamster Ovary) cells; with and without metabolic

activation) (OECD Test Guideline 476)

## Genotoxicity in vivo

Result : negative (In vivo micronucleus test; Mouse, male and female)

(intraperitoneal; ) (OECD Test Guideline 474)

#### **Teratogenicity**

NOAEL : 400 mg/kg bw/day

Maternal NOAEL Develop.

400 mg/kg bw/day

(Rat, Sprague-Dawley)(Oral)(OECD Test Guideline 414)No

adverse effects

# Reproductive toxicity

NOAEL : 853 mg/kg bw/day

Parent

(One-Generation Reproduction Toxicity Study; Rat, wistar, male

and female)(Oral)(OECD Test Guideline 415)No negative effects.

NOAEL : 500 mg/kg bw/day

Parent

(Two-generation reproductive toxicity; Rat, Sprague-Dawley, male

and female)(Oral)(OECD Test Guideline 416)No negative effects.

# **Specific Target Organ Toxicity**

# Single exposure

Inhalation : Target Organs: Central nervous systemMay cause drowsiness or

80000000158 / Version 1.0 11/17 EN

# ISOPROPANOL - DRUM 160K

dizziness.

## Repeated exposure

Remarks

Oral and inhalation repeated exposure studies demonstrated target organ effects in male rats (kidney) and male and female mice (thyroid) by mechanisms of action that are not relevant to humans

# Other toxic properties

## **Aspiration hazard**

Aspiration hazard if swallowed - can enter lungs and cause damage.

Aspiration may cause pulmonary oedema and pneumonitis. Based on available data, the classification criteria are not met.,

# **SECTION 12: Ecological information**

# 12.1. Toxicity

Component:	propan-2-ol	CAS-No. 67-63-0		
	Acute toxicity			
	Fish

# ISOPROPANOL - DRUM 160K

# 12.2. Persistence and degradability

Component:	CAS-No. 67-63-0							
Persistence and degradability								
	Persistence							
Result	: Transformation due to hydrolysis no Transformation due to photolysis no							
	Biodegradability							
Result	: 53 % (aerobic; domestic sewage; F Exposure Time: 5 d)(Directive 67/5 biodegradable.							

# 12.3. Bioaccumulative potential

Component:	propan-2-ol	CAS-No. 67-63-0
	Bioaccumulation	

Result : log Kow 0,05

: Bioaccumulation is not expected.

# 12.4. Mobility in soil

Component:	Component: propan-2-ol						
Mobility							
Water	: The product is water soluble.						

. The product is water soluble

Soil : Mobile in soils

# 12.5. Results of PBT and vPvB assessment

Component:	propan-2-ol	CAS-No. 67-63-0
	Results of PBT and vPvB assessme	ent
Result	: This substance is not considered to nor toxic (PBT)., This substance is n persistent and very bioaccumulating	not considered to be very

# 12.6. Other adverse effects

Data for the product	
	Additional ecological information

# ISOPROPANOL - DRUM 160K

Result Do not flush into surface water or sanitary sewer system.

Avoid subsoil penetration.

## **SECTION 13: Disposal considerations**

#### 13.1. Waste treatment methods

Product Disposal together with normal waste is not allowed. Special

> disposal required according to local regulations. Do not let product enter drains. Contact waste disposal services.

Empty contaminated packagings thoroughly. They can be Contaminated packaging

recycled after thorough and proper cleaning. If recycling is not practicable, dispose of in compliance with local regulations. Do not burn, or use a cutting torch on, the empty drum. Risk of

explosion.

European Waste

Catalogue Number

No waste code according to the European Waste Catalogue can be assigned for this product, as the intended use dictates the assignment. The waste code is established in consultation

with the regional waste disposer.

# **SECTION 14: Transport information**

## 14.1. UN number

1219

#### 14.2. UN proper shipping name

ADR : ISOPROPANOL RID : ISOPROPANOL **IMDG** : ISOPROPANOL

## 14.3. Transport hazard class(es)

ADR-Class : 3

(Labels: Classification Code: Hazard 3; F1; 33; (D/E)

Identification Number; Tunnel restriction

code)

**RID-Class** : 3

(Labels; Classification Code; Hazard 3; F1; 33

Identification Number)

**IMDG-Class** : 3

**Further information** 

Key literature references :

and sources for data

Supplier information and data from the "Database of registered substances" of the European Chemicals Agency (ECHA) were

used to create this safety data sheet.

Methods used for

product classification

The classification for human health, physical and chemical hazards and environmental hazards were derived from a

combination of calculation methods and if available test data.

Hints for trainings : The workers have to be trained regularly on the safe handling of the products based on the information provided in the Safety

Data Sheet and the local conditions of the workplace. National regulations for the training of workers in the handling of

hazardous materials must be adhered to.

Other information : The information provided in this Safety Data Sheet is

correct to our knowledge at the date of its revision. The information given only describes the products with regard to safety arrangements and is not to be considered as a warranty or quality specification and

does not constitute a legal relationship.

The information contained in this Safety Data Sheet relates only to the specific material designated and may not be valid for such material used in combination with any other material or in any process, unless specified in

the text.

	Equipment cleaning and maintenance	Retain drain downs in sealed storage pending disposal or for subsequent recycle.  Drain down system prior to equipment break-in or maintenance.  Clear spills immediately.(PROC8a)	
	Storage	Store substance within a closed system.  Avoid dip sampling.  Provide a good standard of general or controlled ventilation (5 to 15 air changes per hour).(PROC2)	
Conditions and measures related to personal protection, hygiene	Use suitable eye protection.  Avoid direct eye contact with product, also via contamination on hands.		
and health evaluation	· · ·		

## 3. Exposure estimation and reference to its source

#### **Environment**

No exposure assessment presented for the environment.

# Workers

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

# 4. Guidance to Downstream User to evaluate whether he works inside the boundaries set by the Exposure Scenario

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management

Measures/Operational Conditions outlined in Section 2 are implemented.

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

For scaling see: http://www.ecetoc.org/tra

Only properly trained persons shall make use of scaling methods while checking whether the OC and RMM are within the boundaries set by the ES

## Additional good practice advice beyond the REACH Chemical Safety Assessment

Assumes a good basic standard of occupational hygiene is implemented.

# 4. Guidance to Downstream User to evaluate whether he works inside the boundaries set by the Exposure Scenario

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management

Measures/Operational Conditions outlined in Section 2 are implemented.

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

For scaling see: http://www.ecetoc.org/tra

Only properly trained persons shall make use of scaling methods while checking whether the OC and RMM are within the boundaries set by the ES

# Additional good practice advice beyond the REACH Chemical Safety Assessment

Assumes a good basic standard of occupational hygiene is implemented.

## 1. Short title of Exposure Scenario 7: Polymer processing

1. Short title of Exposure ocertails 7.1 olymer processing		
Main User Groups	SU 22: Professional uses: Public domain (administration, education, entertainment, services, craftsmen)	
Process categories	PROC1: Use in closed process, no likelihood of exposure PROC2: Use in closed, continuous process with occasional controlled exposure PROC6: Calendering operations PROC8a: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at non-dedicated facilities PROC8b: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities PROC14: Production of preparations or articles by tabletting, compression, extrusion, pelettisation PROC21: Low energy manipulation of substances bound in materials and/or articles	
Environmental Release Categories	ERC8a: Wide dispersive indoor use of processing aids in open systems ERC8d: Wide dispersive outdoor use of processing aids in open systems	

# 2.1 Contributing scenario controlling environmental exposure for: ERC8a, ERC8d

As no environmental hazard was identified no environmental related exposure assessment and risk characterization was performed.

# 2.2 Contributing scenario controlling worker exposure for: PROC1, PROC2, PROC6, PROC8a, PROC8b, PROC14, PROC21

Product characteristics	Concentration of the Substance in Mixture/Article	Covers percentage substance in the product up to 100 % (unless stated differently).
	Physical Form (at time of use)	liquid
	Vapour pressure	0,5 - 10 kPa
Frequency and duration of use	Frequency of use	8 hours/day
Human factors not influenced by risk management	Assumes use at not more than 20℃ above ambient temp erature.	
Technical conditions and measures to control dispersion from source towards the worker	Bulk transfers	Handle substance within a closed system.(PROC1, PROC2)
	Material transfers	Use bulk or semi-bulk handling systems.(PROC8b)
	Storage	Store substance within a closed system.(PROC1, PROC2)

# 3. Exposure estimation and reference to its source

## **Environment**

No exposure assessment presented for the environment.

Version 1.2 Print Date 14.01.2013

Revision Date 03.07.2012

#### 1. Short title of Exposure Scenario 11: Use in Cleaning Agents

•	
Main User Groups	SU 3: Industrial uses: Uses of substances as such or in preparations at industrial sites
Process categories	PROC1: Use in closed process, no likelihood of exposure PROC2: Use in closed, continuous process with occasional controlled exposure PROC3: Use in closed batch process (synthesis or formulation) PROC4: Use in batch and other process (synthesis) where opportunity for exposure arises PROC7: Industrial spraying PROC8a: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at non-dedicated facilities PROC8b: Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities PROC10: Roller application or brushing PROC13: Treatment of articles by dipping and pouring
Environmental Release Categories	ERC4: Industrial use of processing aids in processes and products, not becoming part of articles

#### 2.1 Contributing scenario controlling environmental exposure for: ERC4

As no environmental hazard was identified no environmental related exposure assessment and risk characterization was performed.

# 2.2 Contributing scenario controlling worker exposure for: PROC1, PROC2, PROC3, PROC4, PROC7, PROC8a, PROC8b, PROC10, PROC13

	Concentration of the Substance in Mixture/Article	Covers percentage substance in the product up to 100 % (unless stated differently).
Product characteristics	Physical Form (at time of use)	liquid
	Vapour pressure	0,5 - 10 kPa
Frequency and duration of use	Frequency of use	8 hours/day
Human factors not influenced by risk management	Assumes use at not more t	han 20℃ above ambient temp erature.
	Bulk transfers	Clear transfer lines prior to de-coupling.(PROC8a)
Technical conditions and measures to control dispersion from source towards the worker	Filling / preparation of equipment from drums or containers	Clear transfer lines prior to de-coupling.(PROC8b)
moni source towards the worker	Cleaning with high pressure washers	Provide a good standard of general or controlled ventilation (5 to 15 air changes per hour).(PROC7)
Conditions and measures related to personal protection, hygiene and health evaluation	Use suitable eye protection Avoid direct eye contact wi	n. th product, also via contamination on hands.

#### 3. Exposure estimation and reference to its source

### Isopropanol

Version 1.2 Print Date 14.01.2013

Revision Date 03.07.2012

#### **Environment**

No exposure assessment presented for the environment.

#### Workers

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

# 4. Guidance to Downstream User to evaluate whether he works inside the boundaries set by the Exposure Scenario

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management

Measures/Operational Conditions outlined in Section 2 are implemented.

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

For scaling see: http://www.ecetoc.org/tra

Only properly trained persons shall make use of scaling methods while checking whether the OC and RMM are within the boundaries set by the ES

#### Additional good practice advice beyond the REACH Chemical Safety Assessment

Assumes a good basic standard of occupational hygiene is implemented.

PA100057\_001 38/115 EN

to personal protection, hygiene	Wear suitable gloves tested to EN374.(PROC8b)	
and health evaluation	Use suitable eye protection Avoid direct eye contact wit	th product, also via contamination on hands.

# 3. Exposure estimation and reference to its source

### **Environment**

No exposure assessment presented for the environment.

# Workers

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

# 4. Guidance to Downstream User to evaluate whether he works inside the boundaries set by the Exposure Scenario

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management

Measures/Operational Conditions outlined in Section 2 are implemented.

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

For scaling see: http://www.ecetoc.org/tra

Only properly trained persons shall make use of scaling methods while checking whether the OC and RMM are within the boundaries set by the ES

to personal protection, hygiene and health evaluation

Avoid direct eye contact with product, also via contamination on hands.

### 3. Exposure estimation and reference to its source

### **Environment**

No exposure assessment presented for the environment.

### Workers

The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated.

# 4. Guidance to Downstream User to evaluate whether he works inside the boundaries set by the Exposure Scenario

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management

Measures/Operational Conditions outlined in Section 2 are implemented.

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.

For scaling see: http://www.ecetoc.org/tra

Only properly trained persons shall make use of scaling methods while checking whether the OC and RMM are within the boundaries set by the ES

# Additional good practice advice beyond the REACH Chemical Safety Assessment

Assumes a good basic standard of occupational hygiene is implemented.
